

E*LDS Electrical accessories with connection cables

Application area and performance characteristics

- Complete cabling – simply Plug & Play
- Decentralised arrangement in refrigerated cases
- Avoidance of design-intensive switch cabinets with long delivery times and high space requirements
- Factory testing for complete function
- Prefabricated and clearly labelled cables for fast and reliable putting into service
- High measurement reliability due to shortened cables, no point to point wiring
- Mechanically fixed and pre-wired unit of all contactors, load and time relays, fuses and auxiliary components for light or blind controllers
- Costs reduction due to high degree of automation, high number of identical components and similarity of the production steps
- Perfect matching of the electrical accessories with controllers
 - From the E*LDS family
 - Integration in external systems of all makes from well-known manufacturers
